## ADDITIONAL INFORMATION ABOUT ME

I am a pre-final year undergraduate student (3rd year 5th semester B.Tech ) at University of Calcutta majoring in Computer Science and Engineering. I am hard-working, motivated and enthusiastic about the work I do. I have good experience as a Website Developer. I love competitive programming and in my free time I am either solving problems or reading books or watching a movie. Having interned at two startups, I am accustomed to working in challenging environments and handling multiple projects at the same time. My duties as class monitor and representative at school and college have taught me how to connect with peers, communicate with seniors and work with everyone as a team.
